

**The Saudi Business-Led,
Zero-Code Actuarial Platform**

Change pricing rules in minutes

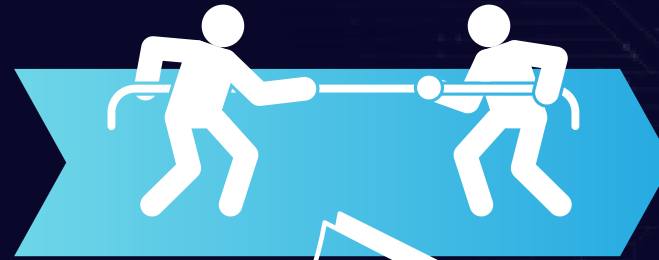

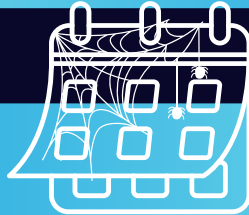

The best motor insurance technology solution 2026

The Silent Crisis in Insurance Pricing

Actuarial intelligence
is trapped behind
code

Pricing teams need
weeks for simple
changes

Aggregators
force price wars

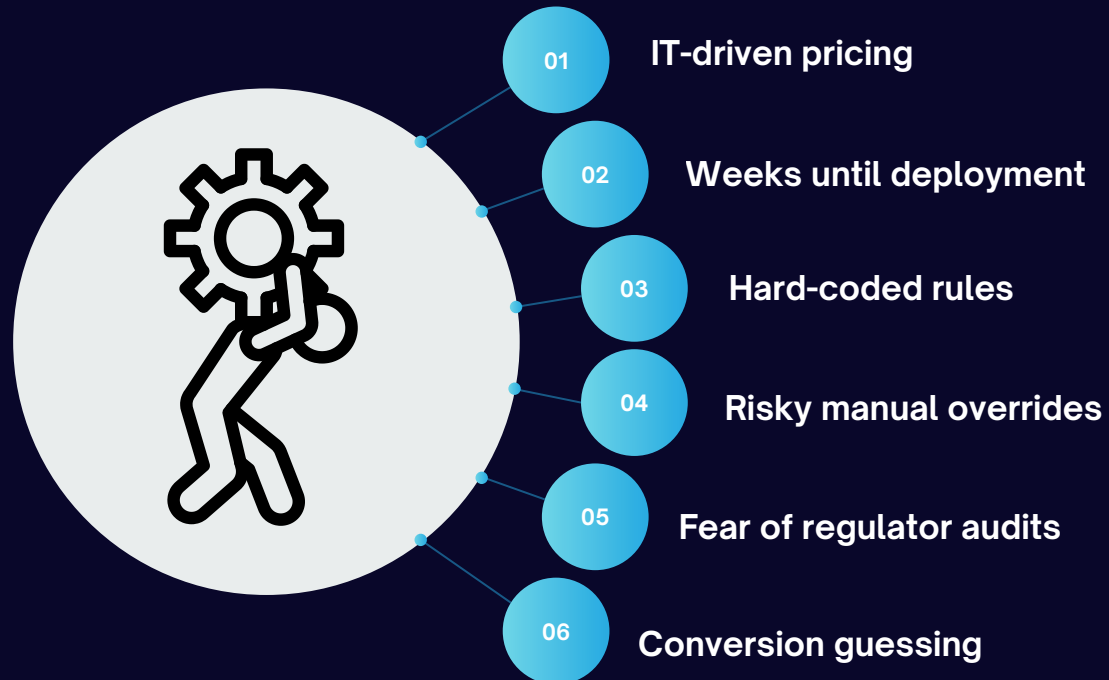

The IA changes
rules fast and often

While your teams wait for the IT, competitors are already converting.

The "17Trust Effect"®

Regulatory Compliance

Designed for regulators before it was designed for insurers

Founded on Security

Flexibility doesn't mean losing control

01

Login and step-up multi-factor authentication

02

Redundancy and disaster recovery capabilities

03

Secure testing environment

04

Behind-the-firewall deployment

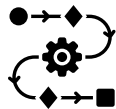

05

Role-based and user-based access control

06

Customizable approval workflows

Insights that Help You Improve Faster

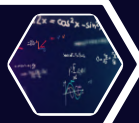

Because lack of insights leads to lost margin

Visual quotation journeys

Pricing scenario
simulation tools

ElasticSearch-powered
global search and filter

Issued quote insights and
conversion metrics

Active vs. inactive API and
flow monitoring

Real-time system
performance dashboards

Custom report generation

Built on Saudi Market Reality

**Integrations with
external and
internal
applications**

**PAS, CRM,
NIC, CarTrust, Najm**

**Designed for
Saudi regulatory
dynamics**

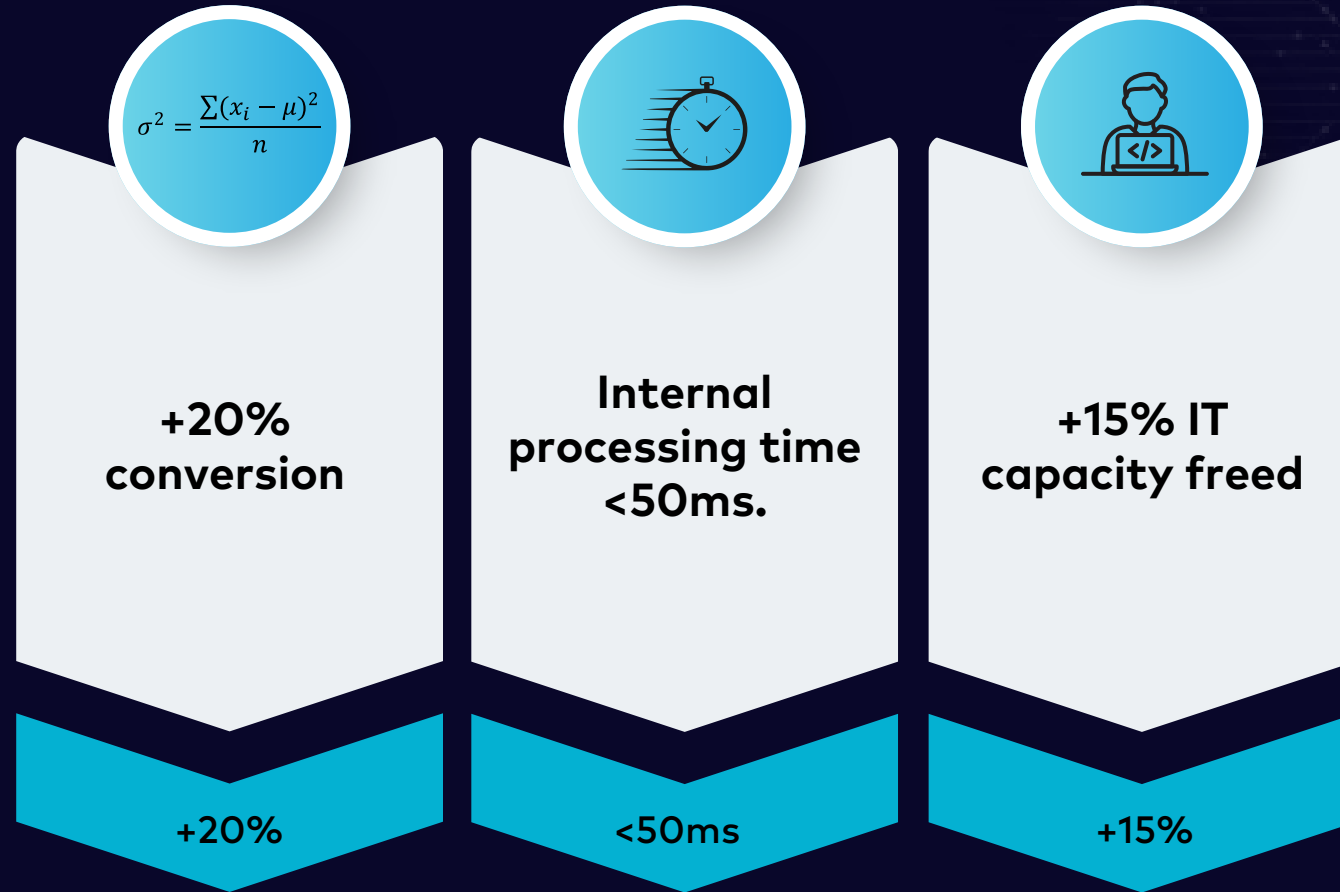

Ready for new IA rules

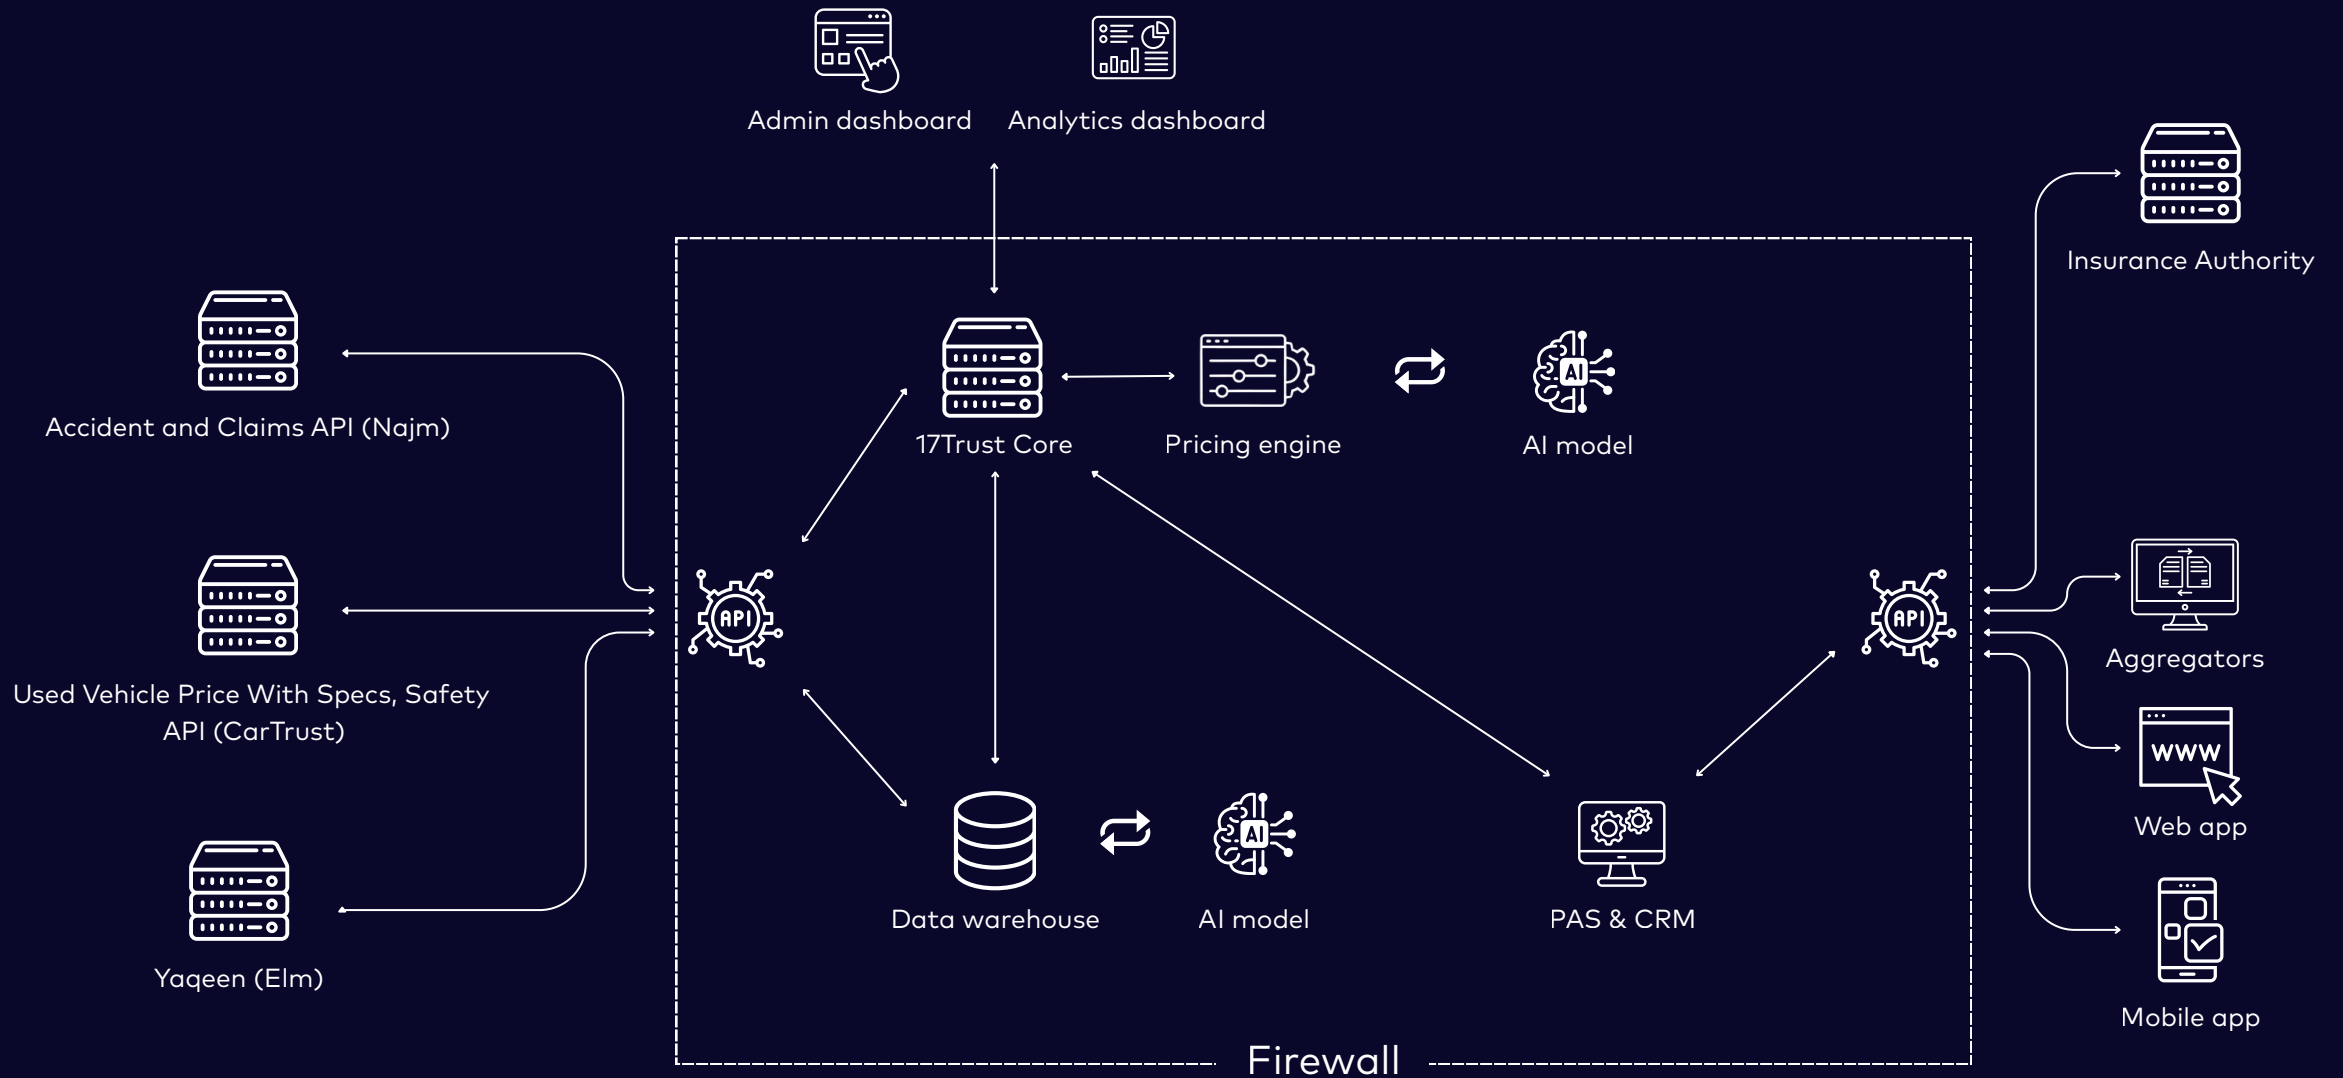

**PDPL-compliant
and flexible
Saudi cloud or on
premise
deployment**

Compliant & secure

Measurable impact in the first 90 days

IT infrastructure layout

Integrations with any internal or external system

Yaqeen (Elm/NIC)	Najm	CarTrust	User input	Internal PAS & CMS	Policy elements	SIMAH
Full name	Past accident count	Vehicle make	Parking type	Channel type	TPL limit	Credit score
ID number	Past claim count	Vehicle model	Overnight parking type	Payment plan	Deductible amount	
Date of birth	At-fault accident count	Model year	Fleet size	Customer type	Agency repair	
Gender	Claims severity	Trim / variant	Mileage	Occupation category	Approved garages	
Marital status	No claim period	Market price	Customer declared value	Age	Bodily injury limit	
National address	Penalty points	Top speed		Age band	Roadside assistance	
Residence type	NCD	Acceleration		Aggregator ID	Courtesy car	
Nationality	Claim type (OD/TP/...)	Vehicle weight		No. of years driving	Natural perils	
Registration status	Claim status	Body type		Past claims count	Theft	
Driving license type	Last accident date	Transmission		Claims severity	Windshield cover	
Driver ID verification	Policy continuity	Safety features		Claim type	Off-road cover	

Competitor price position	Fraud risk indicator	Conversion likelihood score	Price indifference score
Spatial risk index	Vehicle repair cost		

17Trust Gives you the Upper Hand

SLA 99.99% uptime

Enterprise-ready API

PDPL-compliant

On-Premise or Cloud

RBAC & MFA

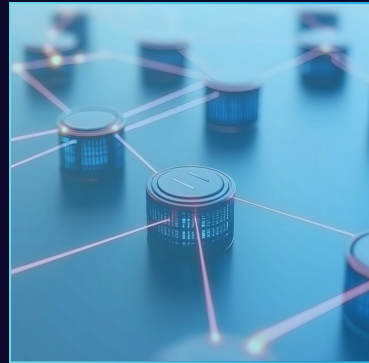

No code tools

10M+ API calls/day

Modular monolith

100 ms response time

Web App Firewall

Pricing speed is now a competitive advantage.

Insurers who adapt quickly win IA's **favour**,
customer **trust**, and higher **margins**.
